

## **AGRICULTURAL AND FORESTRY MACHINES IN THE ROAD TRAFFIC**

Machines intended for the operation on roads in the Czech Republic are subject to an approval by the Ministry of Transport of the Czech Republic.

SZZPLS, J.S.C., under the authorization of the Ministry of Transport of CR, prepares background papers required for approval of the technical worthiness for operation on roads, including the provision of a decision on approval.

### **WE PROVIDE BASIC INFORMATION ON:**

- responsibilities of manufacturers and distributors in terms of operation on roads arising from the Law No. 56/2001 Coll. and its implementing regulations,
- technical requirements for machines in terms of approval for operation on roads,
- conditions of tests being performed that are needful for the approval of the technical worthiness.

### **WE PERFORM TESTS FOR APPROVAL OF THESE MACHINES**

- self-propelled machines – harvesters, forage cutters, sugar-beet harvesters etc.,
- towed working machines – seeders, slurry tankers, ploughs, combinators, forwarders etc.,
- mounted working machines – dyke mowers, machines for primary tillage etc.
